

Business Intelligence Consultant | Research | M/F | LISBON

CBRE is the world's largest real estate services company. With around 70,000 employees in over 60 countries it was named one of the "World's Most Admired Companies" by Fortune magazine. Through our international network we combine diversity, different cultures, know-how and professional excellence.

Operating in the real estate market in Portugal since the opening of our Lisbon office in 1988, CBRE offers services to some of the most important national and international companies in the various sectors of the market.

CBRE acts on behalf of clients in the sale, lease, and property management, offering corporate services, valuation, consultancy and research and building consultancy services. CBRE provides complete real estate services to all real estate market players, companies and private clients, namely occupiers, tenants, developers and investors. We are active in all sectors, including offices, industrial, retail, hotels, resorts and residential and in all the different stages of development: land, property for sale or lease.

SUMMARY OF POSITION

CBRE Portugal is looking for a Business Intelligence Consultant to support the Research Department in Portugal.

The role is based mainly in the CBRE Lisbon office and involves occasional travelling throughout Portugal, namely to Porto, to do market research.

Working in the Research Department the candidate will assist the Head of Research Portugal in the collection, organisation and analysis of information. Under his function the candidate will have to interact with all the departments of the company and the EMEA Research team, as well as with other parties outside the company, such as competitors, clients and other players in the market in order to obtain a full insight on the market performance and trends.

The candidate will have the opportunity to increase his independency and undertake new approaches regarding the performance and outputs of the research area in the company.

The candidate should have very good analytical skills as well as inter-personal skills.

DUTIES AND RESPONSIBILITIES

- Collection of economic and property market information and update of CBRE databases;
- Analysis of information and production of market reports, media articles and commentaries;
- Production of market presentations and introduction to clients;
- Reporting to CBRE Research EMEA team;
- Responding to data requests from other departments of the company, other CBRE offices and CBRE Research EMEA team;
- Supporting Portuguese media with specific information.

PROFILE

- Masters in Information Management, Management, Economics, Engineering or Statistics;
- No more than 5 years of working experience;
- Strong interest for data research as well as analytical thinking and attention to detail;
- Good communication skills - written and verbal - and fluency in English;
- Strong MS Office skills (Word, Excel and PowerPoint). Knowledge of data visualisation tools as well as GIS technology will be an advantage.

If you believe you are the right person for this job, please send your CV and presentation letter in English to jobs.rh@cbre.com, with the following subject: **Research/Business Intelligence Consultant**
